## What's New In AutoCAD?

Enhance your work through feedback collection and visualization of your design's details. Included in AutoCAD Professional 2020 are the Markup Import and Markup Assist commands to help you make changes to your designs as you go. (video: 1:29 min.) Review and interact with 2D and 3D CAD documents in the DWG format. You can now view DWG files for multiple drawings in a DWG library and use Live Links to preview the DWG content of your drawings. (video: 0:55 min.) Rapidly convert your drawings to DWF, DWFx, and PDF format files in DWG format. Use the DWG2DWF command to convert between the DWG, DWF, and PDF file formats. (video: 0:43 min.) Work with drawings in DWF, DWFx, and PDF format. In addition to the DWG format, you can now open, view, annotate, and draw over DWF, DWFx, and PDF files, including 3D DWF files. (video: 1:03 min.) Support for Windows Server 2019 Autodesk can now support Windows Server 2019. AutoCAD 2023 can be installed on a server running Windows Server 2019 for a new line of server products from Autodesk. (video: 1:29 min.) General improvements and bug fixes: Use the X and Y coordinates of the current drawing object instead of the previous/next drawing object when inserting a path. (Bug 651601) When using the Move or Resize command on the Pencil tool, the current drawing or command active object is displayed by default. (Bug 651602) When a selected entity is duplicated in an EntityList, the selection indicator disappears when the entity is deleted. (Bug 651604) The arrowhead display on the Frame tool is updated when the user changes the properties of the arrowhead shape. (Bug 651605) When the user attempts to select an image and move the cursor to a coordinate on the image, the arrowhead display is updated for the image. (Bug 651606) The Preview Tooltip, Move, and Resize commands are not displayed in the command line. (Bug 651609) An EntityList selection for dimensions no longer clears when the dimension unit is changed
