## House Flipping Spreadsheet Crack [32|64bit]

This spreadsheet has been divided into six categories with all the information you need to quickly and accurately determine the Maximum Purchase Price you should offer to any investor or property management company. The spreadsheet will help you estimate; - Best Cost Estimate by Location - Best Cost Estimate by Category - Average Cost Estimate by Category - Total Direct & Indirect Cost Estimate per room - Average ROI and Net Income per Room for all Investment Properties - Average Return on Investment per Room The spreadsheet is in Word, Excel, and PDF formats with instructions included. This spreadsheet is the high level spreadsheet that will help you analyze any property (from rehabs to NEW Construction) as a single cost center using the categories above. The spreadsheet is based on the national average for a single bedroom property and will help you analyze the entire investment portfolio at once. Our products are always FREE to the public, but if you do want to support the hard work we have put into the company, please consider making a donation. ### What's New in the House Flipping Spreadsheet?

Are you planning to buy, flip or invest in your first home? Are you having trouble knowing how much to offer for a prospective property? With this spreadsheet you can quickly calculate repair cost estimates and analyze deals to determine the Maximum Purchase Price to offer for a property. The House Flipping Spreadsheet is a powerful Microsoft Excel worksheet that can help rehabbers and investors to quickly calculate detailed repair cost estimates and analyze deals to determine the Maximum Purchase Price to offer for a potential investment property. House Flipping Spreadsheet Features:

- Over 200+ work items and unit costs – Build your detailed repair cost estimate with over 200 items and unit costs. Change items, add new items, sort by item and work item category, copy and paste data from your own system or query the database using Excel's built-in formulas for even more flexibility.
- Repair Costs – Inspect and repair the property, identify the cost of the repairs, and calculate the approximate costs for labor and materials. More detailed repair cost estimations can be found in the House Flipping Spreadsheet Repair Costs user guide.
- Properties Database – Contains over 500 completed renovation and construction projects from across the country. Use the handy "Data Filters" to easily query and update the database of real estate properties to find high-potential deals.
- Maximum Purchase Price Calculator – Use the Excel MaxPurchasePrice feature to calculate the Maximum Purchase Price. You can modify the Number Of Units, Number Of Bathrooms, Unit Size, etc., and find out the Maximum Purchase Price, as well as the Unit Costs for the different scenarios.
- Profit & Loss Calculator – Use the calculation tools to measure the profitability of a property before and after the repairs are made.
- Income & Expense Statement – Use the Excel summary and analysis tools to compare the income and expenses on a property before and after repairs are made. This can help you determine if you have the cash flow to make the repairs.
- Renovation Cost Estimates – Use the Repair Cost Estimates tabs to calculate detailed repair cost estimates on a property. The estimates can be utilized for estimating repair cost on a property before you purchase, allowing you to set an aggressive purchase price.
- Rental Cost Estimate – Use the Excel summary and analysis tools to determine the rental expense of a property before and after repairs are made. This can help you determine if you have the cash flow to make the repairs.
- Median Price – Enter the median sales price and number of units in the zip code
