Even as the temptation to find the worst person possible to play against is strong, a practical consideration should apply. Bumping into an opponent who is also an experienced opponent who has played against you before is not particularly helpful; they will likely play more conservatively. One can't count on that, and one shouldn't even try. There is a lot of strategy in reading the minigames and deciding how to play them, and some will be very predictable. You will need to read the minigames to know if you can pull out a gameplan or if the other person will beat you with a different plan. Sometimes it will work and

You are now reading the game in a way that can help you win it or even get a win. Sometimes a great opponent will beat you, and sometimes you will beat a good opponent. That is not something to be worried about. Either way, 6d1f23a050
